## DEATH OF EDWIN PFEIFER

Hemorrhage of the Heart Caused  
Death, Saturday Evening.

Mr. and Mrs. Max Pfeifer have the sympathy of the community in their bereavement caused by the death of their fifteen-year-old son, Edwin, which occurred at the family home Saturday evening, as a result of Hemorrhage of the heart.

Edwin had been seriously ill for several days as a result of an attack of hemorrhages caused by leakage of the heart, a malady with which he had been afflicted all his life.

Edwin Maxmillian Pfeifer was born at Donnybrook, North Dakota, on September 13, 1903, and at the time of his death was 15 year, 6 months and 22 days old.

Deceased took a great interest and was very active in his school work up until about February 1st, when health began to fail so rapidly that he was compelled to give up his school duties.

Funeral services were held Tuesday afternoon, at 2:00 o'clock, from the Presbyterian church, Rev. T. R. Taggart officiating. The remains were laid to rest in the Groton Union cemetery.

Edwin was of a lovable and happy disposition and his death will be severely felt by his family and friends.
